POND KITS

Transform your outdoor living space with a beautiful ecosystem pond that can be created with a convenient kit. The Aquascape approach to creating backyard pond kits is to provide a complete low-maintenance system that works with Mother Nature for a naturally balanced pond with clean, healthy water. All pond kit components selected work well together and complement the addition of rocks, gravel, fish, and plants. Aquascape offers a variety of pond kit sizes to suit your space.

Pond Kits

The Ecosystem Pond
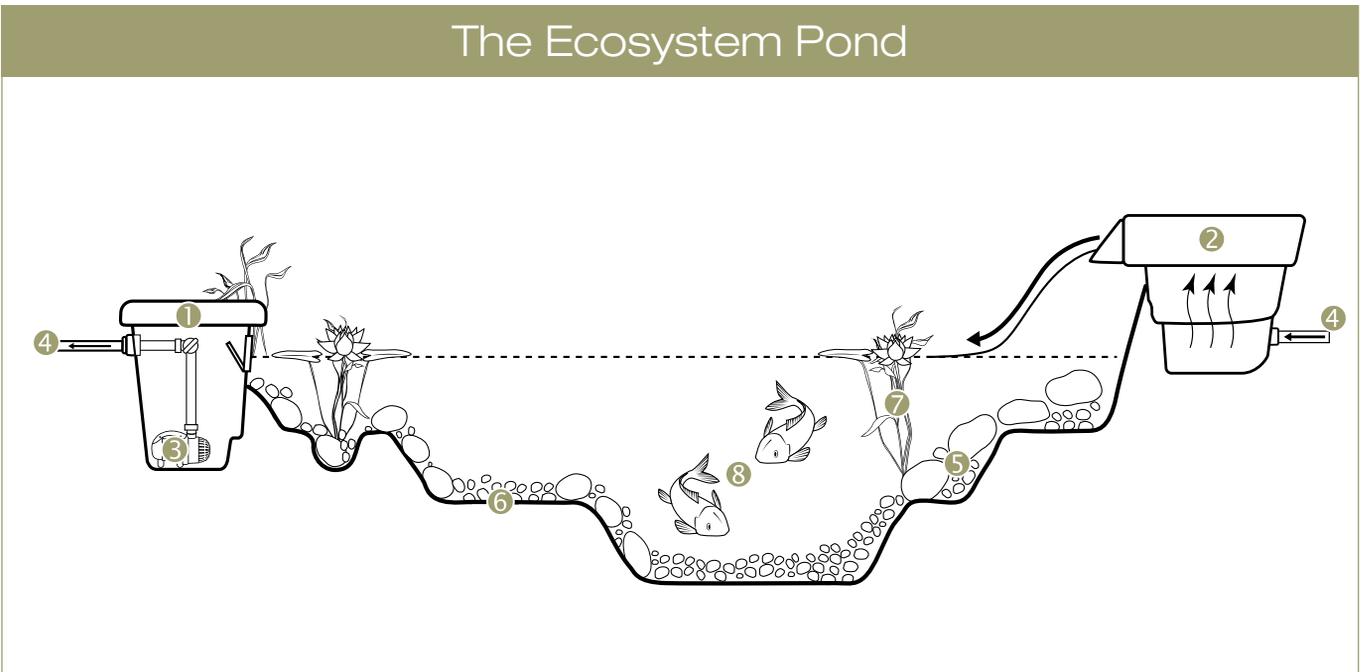

① Pond Skimmer
Pre-filters water and houses pump, collects debris, and reduces maintenance

② BioFalls® Filter
Provides surface area for beneficial bacteria to colonize and remove excess nutrients from the water

③ Pond Pump
Pumps water from the Pond Skimmer to the BioFalls Filter to create a waterfall

④ Pipe
Directs water from the skimmer to the BioFalls Filter

⑤ Rocks and Gravel (not included)
Protects the liner, naturalizes the pond bottom, and provides surface area for beneficial bacteria to break down excess nutrients

⑥ Pond Liner and Underlayment
Forms the pond's foundation, containing the water and allowing for gases to escape from beneath the pond

⑦ Plants (not included)
Aquatic plants filter pond water, thereby minimizing maintenance and improving water conditions.

⑧ Fish (not included)
Provide nutrients for pond plants and reduce maintenance

PONDLESS® WATERFALL KITS

A Pondless® Waterfall is simply a re-circulating waterfall or stream without the presence of a pond. Aquascape Pondless Waterfall Kits work by pumping water contained in a large, in-ground reservoir up and through the Waterfall Spillway, allowing the water to flow back down into the reservoir. This simple recirculation system requires very little maintenance, is easy to install, and ideal for families with young children or pets that love to play in water.

All waterfall kit components selected work well together to complement and enhance your existing landscape. In just one day you can enjoy the soothing sight and sound that a waterfall adds to your yard.

The Backyard Waterfall Landscape Fountain Kit

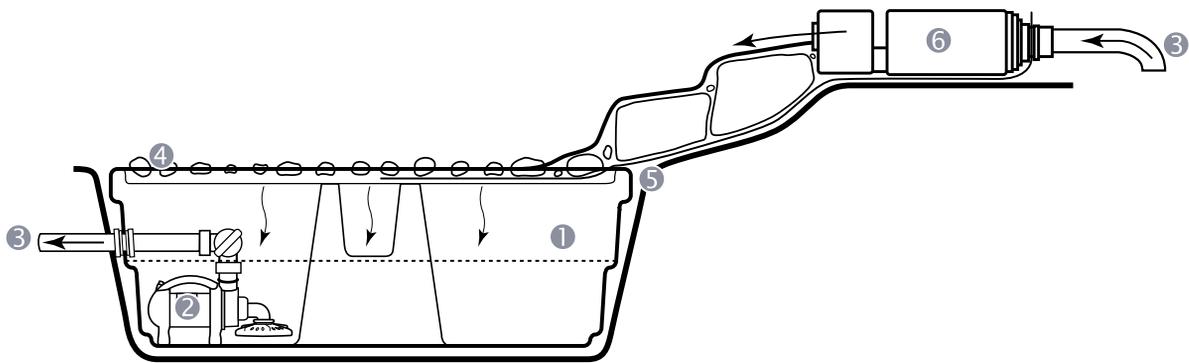

① AquaBasin® 45
Provides a basin for water to be stored and protects the pump

② Pond Pump
Pumps water from the water storage area back to the spillway to create a waterfall

③ Pipe
Directs water from the basin/reservoir to the Waterfall Spillway

④ Rocks and Gravel (not included)
Naturalizes the waterfall and filters the water

⑤ Liner and Underlayment
Creates the form of the waterfall and stream

⑥ Waterfall Spillway
Provides a smooth, flowing waterfall

The Pondless® Waterfall Kit
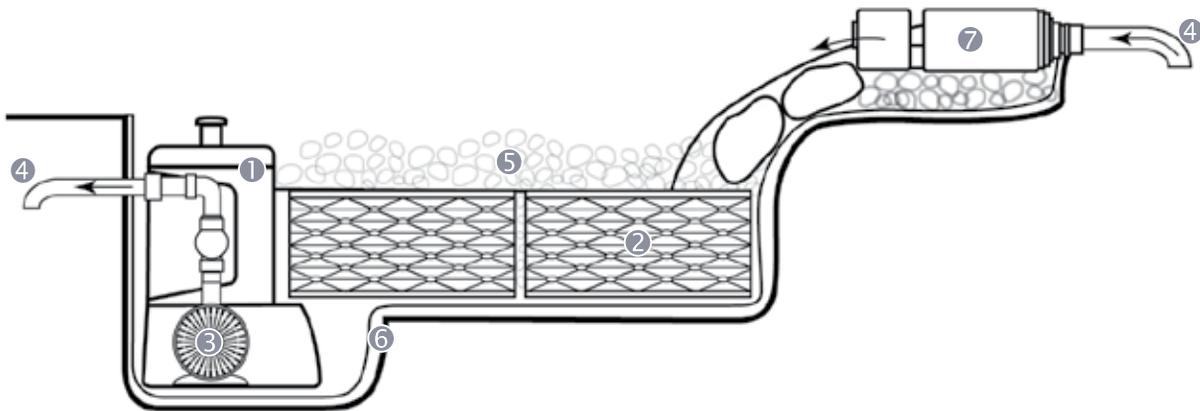

① Pondless® Waterfall Vault
Protects pump

② AquaBlox® Water Storage Modules
Provides water storage

③ Pond Pump
Pumps water from the underground reservoir to the spillway to create a waterfall

④ Pipe
Directs water from the basin/reservoir to the Waterfall Spillway

⑤ Rocks and Gravel (not included)
Naturalizes the waterfall and filters the water

⑥ Liner and Underlayment
Creates the form of the waterfall stream and holds water in the water storage area

⑦ Waterfall Spillway
Provides a smooth, flowing waterfall

LANDSCAPE FOUNTAIN KITS

Aquascape Landscape Fountain Kits make it easy to add a splash of water to any space in your yard, making them an ideal choice for any space. Available in a variety of options, you're sure to find one that suits your unique style.

Landscape Fountain Kits come with all the necessary components to install a recirculating fountain in just a few hours. A sub-surface basin holds the water and pump, which pushes the water up through the fountain for a stunning display. Install just one fountain, or group several together for a truly unique water feature. Just add decorative rock or mulch to complete your fountain. Then sit back and enjoy the soothing sights and sounds of running water.

The Landscape Fountain Kit
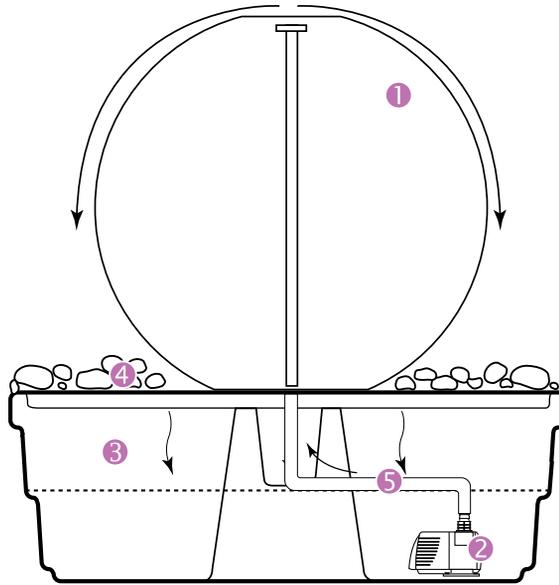

① Fountain
Choose from any one of the nine Aquascape fountain options

② Pond Pump
Pumps water from the underground reservoir through the center of the fountain

③ AquaBasin® 45
Provides a basin for water to be stored and protects the pump

④ Rocks and Gravel (not included)
Disguises the AquaBasin and naturalizes the water feature

⑤ Pipe
Directs water from the basin to the fountain

Landscape Fountain Kits

Aquascape Landscape Fountain Kits come complete with all the materials needed to create a beautiful focal point in any outdoor space, including an AquaBasin® 45, pipe, and the properly-sized pump. The Mongolian Basalt Columns and the Pagoda Fountain Rocks include Pond and Waterfall Foam Sealant.

FILTRATION

The Science Behind Filtration

There are two forms of filtration critical to maintaining a healthy ecosystem pond: mechanical and biological. Through mechanical and biological filtration, ecosystem ponds will process fish waste, uneaten fish food, leaves, and runoff from lawns.

In ecosystem ponds, mechanical filtration is provided by a pond skimmer and biological filtration is provided by a BioFalls® Filter

How to Choose the Right Filter for Your Pond

To keep your pond or water feature looking beautiful, it is important to provide proper filtration. Features and benefits of Aquascape filters are noted in the following pages, making it simple and easy to select the correct filter for your application.

New Ponds

The advantage of choosing the right filter before you get started should not be underestimated. Aquascape takes an ecosystem approach to water gardening. This approach uses a pond skimmer and BioFalls Filter. The skimmer removes leaves and debris from the surface of the pond, optimizing water quality. A BioFalls Filter performs two very important functions; it supports mechanical and biological filtration and provides a great start to any waterfall.

Existing Ponds

In some circumstances it can be challenging to add a skimmer and BioFalls to an existing system. Perhaps the shape or building technique makes it prohibitive. In this situation we recommend the use of an UltraKlean™ Pond Filter, Submersible Pond Filter, Pond Waterfall Filter, or Pond Filter Urn. These filters will retrofit quickly into existing systems and provide efficient mechanical and biolocial filtration.

Pond Skimmer Filters

Pond skimmers are designed to eliminate water quality problems and reduce maintenance by removing debris before it sinks to the bottom of the pond, allowing a pond to be installed anywhere, even beneath trees. Because the skimmer removes debris before it reaches the pump, it acts as a pre-filter, reducing pump maintenance and making pump access quick and easy. All pond skimmers include a limited lifetime warranty.

BioFalls® Filters

Features and Benefits of the BioFalls® 1000 Filter

① Filter Media Net: BioFalls Filter Media Net (BioBalls sold separately)

② Biological Filter Mats: Two standard biological filter mats

③ Optional BioBalls Filter Media (#98464): Supports effective biological filtration by providing textured surface area for beneficial bacteria to grow and colonize (BioBalls sold separately)

④ Optional Rock Tray (#98285): Holds rocks, plants, and gravel, naturalizing the filter into the surrounding landscape (Rock Tray sold separately)

Features and Benefits of the BioFalls® 2500 and 6000 Filter

① Reversible Waterfall Lip: Reversible waterfall lip provides the option of using a natural stone spillway

② Removable Rock Tray: Removable rock tray holds rocks, plants, and gravel, helping to naturalize the filter into the landscape

③ Filter Media Net: BioFalls Filter Media Net (BioBalls sold separately)

④ Corrosion-Resistant Hardware: Corrosion-resistant, non-cross-threading hardware stands up to the elements

⑤ Biological Filter Media: Two Poly-Flo ESA biological filter mats provide 50% more surface area than traditional filter mats

⑥ Multiple Plumbing Options: Two bulkhead ports provide multiple plumbing options

⑦ Support Rack: Filter support rack ensures evenly distributed water flow through filter mats and provides structural strength to the walls of the filter

⑧ Circular Shape: Circular shape provides maximum strength and makes it easy to camouflage into the landscape

Additional Pond Filters

These filters are ideal for smaller ponds, including preformed ponds or container water gardens. These filters can be easily incorporated into existing ponds, and are ideal for use with Aquascape Ultra, EcoWave®, AquaSurge®, or AquaForce® Pumps.

Pond Waterfall Filter
#77020

Packaged Weight: 11 lb

- Provides efficient mechanical and biological filtration for ponds up to 1,000 gallons
- Includes rigid filter mat and biological filter media net

Features of the Pond Waterfall Filter

① Durable, circular construction ensures maximum strength

② Filter mat provides ideal mechanical and biological filtration

③ Included filter media net holds biological filter media (filter media sold separately)

④ Filter rack provides support for filter media

⑤ Fitting accepts 1", 1¼", and 1½" pipe sizes

Small Pond Filter Urn
#77006

Packaged Weight: 16.1 lb
Dimensions: 20"L x 11"W x 11"H

Features of the Pond Filter Urn

① Removable filter lid allows easy access for cleaning

② Decorative filter housing can be easily incorporated into any setting

③ Inlet hose accomodates most small pumps

④ Mechanical filtration removes debris

⑤ Ceramic filtration rings provide bacteria with a large surface area for colonization

② Pre-Filtration Sponge: Provides efficient mechanical and biological filtration and dramatically reduces pump maintenance

③ Threaded Intake and Multi-Hose Adapters: Included adapters make it easy to adapt to most pond pumps with a small piece of kink-free pipe or threaded fitting

④ Ceramic Filtration Rings: Provide surface area for beneficial bacteria to colonize, providing efficient biological filtration

Container Water Garden Filter

The Aquascape Container Water Garden Filter is a complete solution for container water gardens or containers with stagnant or non-moving water, including birdbaths and water containers holding pond plants like lotus or waterlilies. The magnetically-driven motor is simple and easy to maintain and extremely energy-efficient. The durable pre-filter water intake design prevents clogging and reduces pump maintenance.

UltraKlear® UV Clarifier

The Aquascape UltraKlear® UV Clarifier uses a technologically-advanced T5 high-output UVC bulb to eliminate green water. The Aquascape UltraKlear UV Clarifier features a swirl sleeve which directs the water around the UV bulb, maximizing contact time and increasing UV efficiency up to 50% over traditional UV clarifiers. It is simple and easy to use, install, and maintain and can be mounted horizontally or vertically.

UltraKlean™ Pond Filters

Aquascape UltraKlean™ Pond Filters provide optimum water quality and crystal clear pond water. The unique sponge-free design minimizes maintenance and maximizes efficient mechanical and biological filtration. The simple-to-use cleaning feature allows the unit to be backwashed in less than five minutes without opening the canister or getting hands dirty. It efficiently traps dirt and debris and integrates easily into new or existing ponds. UltraKlean Pond Filters include a high-output UV clarifier and electronic bulb-saver function that eliminates green water caused by suspended algae.

Waterfall Spillway

The Aquascape Waterfall Spillway is a cost-effective solution to create the starting point of a beautiful waterfall and stream. Use it to create a smooth, consistent, leak-free water flow. Pair multiple Waterfall Spillways together to design larger, more complex waterfall configurations. The durable design makes it easy to disguise by allowing soil, rocks, or logs to be placed directly on top of the unit. It is an excellent choice for designing additional waterfalls and streams onto new or existing ponds that already have a biological filter, or starting waterfalls on Pondless® Waterfall systems, where, due to the absence of fish, biological filters aren't necessary. The Waterfall Spillway can also be built behind hardscape walls to provide a more formal waterfall design.

② Watertight connection using the fitting on the back of the Waterfall Spillway

③ Wide spillway opening handles high flow rates

④ Internal barriers provide a smooth-flowing waterfall
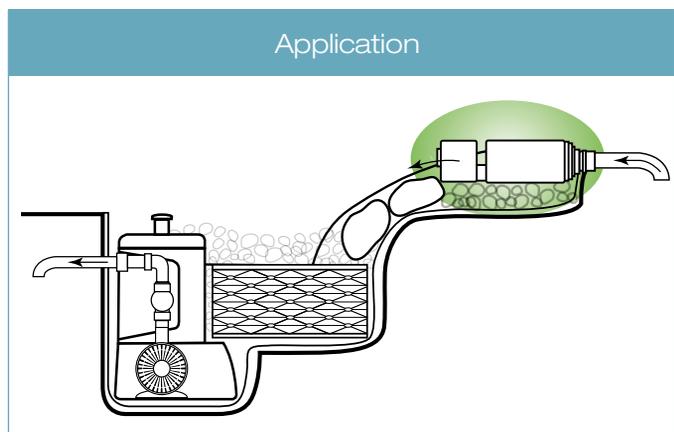

Pondless® Waterfall Vault

The Pondless® Waterfall Vault is the ideal pump vault for use in Pondless Waterfalls, rainwater harvesting systems, and large fountains, effectively protecting the pump and simplifying maintenance. It is simple to install and maintain and fits a wide range of pump sizes and flow rates. It is also perfect for use with the AquaBlox® Water Storage Modules, as Pondless Waterfall Vault Extensions can be used to extend the height for deeper applications. Both the Pondless Waterfall Vault and Extensions are made from durable rotationally-molded polyethylene. The Pondless Waterfall Vault Extensions simply slide onto the Pondless Waterfall Vault to increase its height for applications using AquaBlox Large Water Storage Modules or taller pumps.

AquaBlox® Water Storage Modules

AquaBlox® Water Storage Modules provide an efficient way to maximize water storage capacity in Pondless® Waterfall reservoirs, rainwater harvesting systems, and permeable paver applications. They allow over 3 times more water storage capacity than gravel and hold approximately 7.4 gallons of water per cubic foot, compared to gravel, which holds approximately 2.2 gallons of water per cubic foot. The extra water storage capacity means less time topping off the reservoir due to evaporation and allows for a smaller reservoir footprint. It is also easier to clean and less prone to clogging than traditional gravel basins, and uses less labor to excavate and move gravel. AquaBlox also use less liner and geotextile underlayment than reservoirs constructed with gravel.

Snorkel® and Centipede® Wetland Filter

Our patented Snorkel® Vault and Centipede® Module were specifically designed to tackle the common issues that plague large scale water features. They are modular in design, allowing builders and designers the flexibility to expand the system to meet their needs. It is highly effective at removing sediment (suspended solids) from ponds, improves water clarity, and reduces the need for costly and invasive dredging. The filter system works on earth bottom and liner membrane ponds and is easily retrottited onto existing ponds. It also reduces the physical and chemical maintenance that goes along with removing algae.

① **Snorkel® Vault:** Allows pump to be dropped in for easy cleaning and has four ports for Large Centipede Module attachment (Large Snorkel Vault Extensions can be used when creating deeper basins or using the AquascapePRO 10,000 or 12-PN pump)

② **Large Centipede® Module:** Sits at the lowest point in the filter and ensures maximum water distribution and allows for efficient sediment removal during cleaning

③ **AquaBlox®:** Provides water storage

④ **Rubber Coupling:** Creates a water-tight seal

⑤ **Flex PVC Piping:** Directs water to Centipede Module

⑥ **Rocks and Gravel:** Naturalizes the wetland area

IonGen™ System G2

The IonGen™ System G2 effectively removes algae without the use of traditional liquid chemicals. Designed with a microprocessor that sends a signal to its ion producing probe, the IonGen helps to control algae throughout the entire water feature.It is simple to install, energy-efficient, and compatible with water containing fish and plants. The IonGen is effective at treating ponds up to 25,000 gallons and comes complete with electronic control panel, outdoor-rated transformer, flow chamber, probe, probe fittings, probe holder, copper test kit, alkalinity test kit, and owner's manual

PUMPS

Selecting the proper submersible water pump is extremely important in order to achieve optimum performance of your pond or water feature. There are three basic types of water pumps available in the water feature industry: direct-drive, asynchronous, and magnetically-driven pumps (also known as mag-drive). The following section will help you make the right selection. If you have questions about pump selection, please visit our Pond Pump Selection Guide at aquascapeinc.com/pond-pumps or contact Aquascape Customer Care.

Direct-Drive

Direct-drive water pumps provide consumers with a high torque, high head height pump option. Direct-drive pumps are generally easier to maintain because of their ability to handle larger solids. It is important to note that these pumps have to be operated within a specific performance curve to optimize lifespan.

Mag-Drive

Mag-drive water pumps are a simple and easy-to-use solution for small water features including decorative fountains and spitters. These pumps are easy to retrofit into existing water features. Mag-drive pumps have only one moving part, making them inexpensive and easy to maintain. Mag-drive pumps are also extremely quiet and energy-efficient.

Asynchronous

Asynchronous water pumps are a hybrid between a direct-drive and mag-drive pump. They have only one moving part, making them less expensive and easy to maintain. This type of pump is extremely energy-efficient, and choosing one over a traditional direct-driven pump often pays for itself quickly in power consumption savings.

Smart Control Receiver

The Aquascape Smart Control Receiver is required to run Aquascape adjustable flow pond pumps, allowing you to control your pump at anytime from anywhere. The specially designed receiver makes it easy to connect your pump to the Smart Control App on your smartphone or tablet, allowing for a variety of wireless control functions, including flow adjustment and customized scheduling.

- The Smart Control Receiver includes an integrated control panel with digital numeric display and quick and easy flow adjustment.
- Connecting your device is quick and easy, simply plug in your pump, download the Smart Control App, pair the receiver to your device, and enjoy!
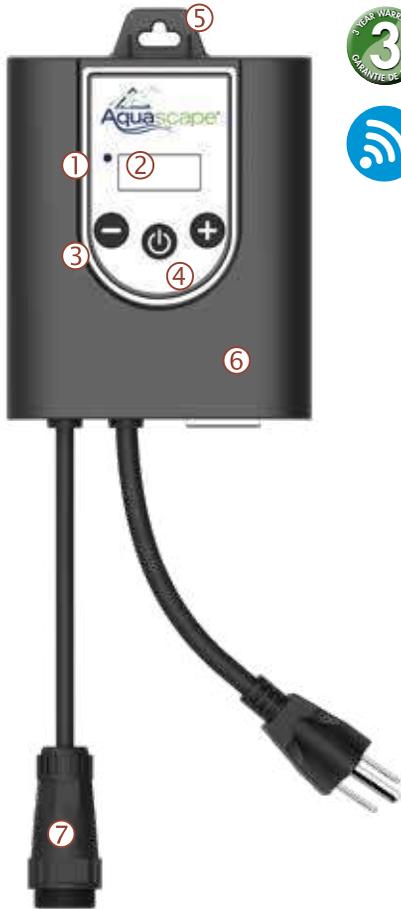

Features and Benefits

① WIFI pairing light indicates active connection

② Integrated control panel clearly displays current flow settings

③ Flow adjustment controls allow for quick and easy on-board flow control

④ On/Off controls allow the pump to be turned on or off without a remote or device

⑤ Integrated hang tag provides secure mounting option

⑥ Durable, weather-resistant, injection-molded housing is built to last

⑦ Integrated, weather-proof, quick-connect fitting makes setup quick and easy

⑧ Aquascape Smart Control App allows for a variety of wireless control functions, including flow adjustment and customized scheduling

AquaSurge® Pond Pumps

Features and Benefits

① Compact size makes it the perfect pump for pond skimmers

② Built-in cord strain relief protects the cord from being damaged

③ Asynchronous motor technology makes this pump more powerful than traditional magnetically-driven pond pumps

④ Unique ceramic shaft with cooling port prevents the pump from overheating

⑤ Simple and secure threaded disconnect allows the pump to be easily removed from the skimmer for maintenance or winterization

⑥ Integrated rubber feet prevent noise and vibration

⑦ The rotational ball output allows the discharge position to be easily adjusted

⑧ Included pump stand allows for vertical positioning

⑨ Fittings include (2) 1", 1.25", 1.5" multi-hose fittings, 1.25", 1.5", 2" multi-hose fitting, 1.5", 2" multi-hose fitting, 1.5" rotational ball output, 1.5" female coupler, 1.5" male coupler

EcoWave® Pond Pumps

EcoWave® Pond Pumps are magnetically-driven (mag-drive) pond and waterfall pumps developed to provide extremely high flow rates. The internal, smart mag-drive motor technology and vortex style impeller allows these pumps to push an incredible amount of water with an electrical efficiency unmatched by other pumps with similar flow rates. EcoWave Pond Pumps are ideal for use in pond skimmers and Pondless® Waterfall Vault applications with lower head heights. Made for continuous use, the EcoWave pumps will not corrode or rust. They are complete with a compact and oil-free design that prevents pond contamination.

AquaForce® Solids-Handling Pond Pumps

AquaForce® asynchronous, solids-handling waterfall and filter pumps combine energy-efficient performance, high flow rates, and ease of maintenance, making this pump the ideal choice for discerning pond owners. The AquaForce protective pre-filter cage allows the pump to be placed directly into the pond. AquaForce pumps are able to pump solids up to .25" inch in diameter, making it ideal for use with external pressure filters or Aquascape waterfall filter systems. The asynchronous motor technology provides high torque, trouble-free performance and is easy to maintain. Its oil-free design prevents pond contamination. The AquaForce can be used as a de-icer pump during cold weather months.

AquaForce® Solids-Handling Pond Pumps

Feature and Benefits

① Protective pump cage prevents large debris from clogging or damaging pump, reducing maintenance

② Large cage openings allow solids to be easily passed and filtered, preventing the pump from being clogged or damaged

③ Asynchronous motor technology makes this pump more powerful than traditional magnetically-driven pond pumps

④ The simple and secure threaded disconnect allows the pump to be easily removed from the pond for maintenance or winterization without removing hose clamps or plumbing assembly

⑤ The wide, flat shape of the pump cage makes it stable and easy to place in the pond

⑥ The rotational ball output allows the pump discharge position to be easily adjusted, making this pump ideal for all shapes and sizes of ponds

⑦ Fittings include (2) 1", 1.25", 1.5" multi-hose fittings, 1.25", 1.5", 2" multi-hose fitting, 1.5", 2" multi-hose fitting, 1.5" rotational ball output, 1.5" female coupler, 1.5" male coupler

Pond Powerhead

The Aquascape Pond Powerhead is an innovative low voltage circulation pump designed to create water movement in ponds. Either set the powerhead directly in the pond or disguise it using rocks or other materials. Great for solving problems with stagnant water, the Pond Powerhead provides water movement, surface agitation, aeration, and circulation. Its small compact design makes it easy to install in a new or existing water feature and requires no pipe or plumbing. The energy-efficient, low voltage 40-Watt motor can be powered by a standard outdoor 12-volt low voltage transformer **(sold separately, see page 74).** It includes 25 feet quick-connect cable and can be used alone or with additional Pond Powerheads to maximize circulation in larger water features.

Ultra Water Pumps

Ultra Water Pumps are the complete solution for decorative fountains and spitters. These versatile pumps include a three-way or single valve and multi-size hose connection, making them adaptable to almost any pipe or tubing size. The magnetically-driven motor technology is easy to maintain and extremely energy-efficient, saving hundreds of dollars over traditional water pumps. The durable pre-filter cage design protects pump and reduces pump maintenance, and its oil-free design prevents contamination.

AERATION

Every biological process that occurs in ponds is dependent on oxygen. This is especially important in warmer temperatures or at night when plants are not converting sunlight into oxygen. Pond aerators supply dissolved oxygen directly to ponds and other water features, helping all biological processes and resulting in healthier fish and plants. Proper aeration creates a stable pond environment, keeping water healthy, clean, and clear. Aeration can also be used during cold winter months to keep a hole open in the ice formed at the surface of the pond, allowing for necessary de-gassing.

Aquascape provides a complete line of pond aeration supplies that are available as complete kits or individual components, including compressors, diffusers, weighted tubing, and more. The specification chart and following information will help you to make the right product selection.

Pond Aerator Application
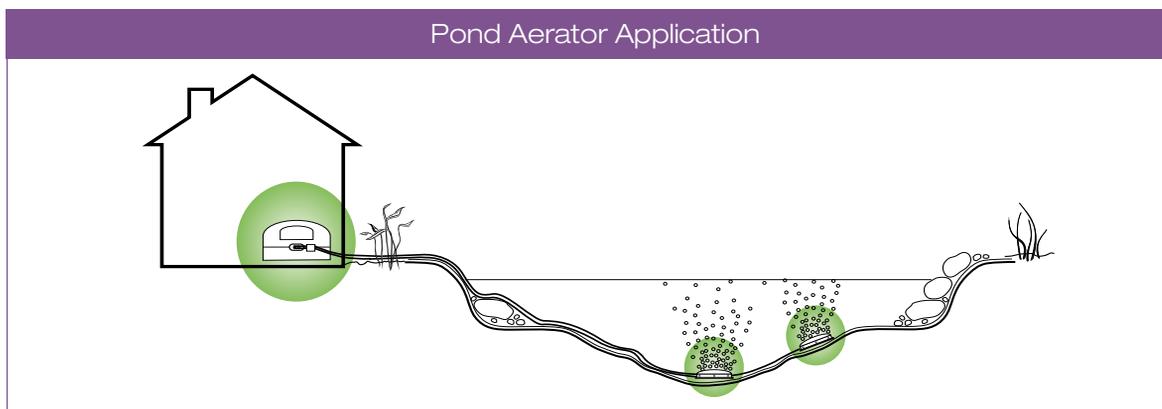

2-Outlet and 4-Outlet Pond Aeration Kits

Aquascape 2-Outlet and 4-Outlet Pond Aeration Kits provide efficient aeration for ponds and water features up to 3,500 gallons, resulting in a healthier ecosystem and happier fish and plants. These aerators are extremely energy-efficient and operate quietly. They are simple to use and easy to maintain. The durable outer housing prevents damage, and the kits include a winter resistant air line, preassembled check valves, and air discs.

POWER

Aquascape low-voltage products like LED lighting and the Pond Powerhead require 12-volt transformers.

Aquascape offers a variety of power accessories including an array of low-voltage transformers and a Smart Control Plug designed to control your Aquascape products with the Smart Control App on your smartphone or tablet.

Transformers

Aquascape transformers provide an economical solution for operating low-voltage products such as lighting or Pond Powerheads. A variety of power options are available and each transformer includes quick-connect connections for quick and easy installation.

WATER TREATMENTS

Aquascape Water Treatments

Combining science with simplicity, Aquascape makes it easy to maintain a healthy, well-balanced water feature.

Aquascape Water Treatments make dosing simple and affordable. Put away your calculator and enjoy a clean, clear, and healthy ecosystem pond, Pondless® Waterfall, or decorative fountain with the complete line of Aquascape water treatment products

Water Treatment Options

Aquascape has a variety of options to naturally and efficiently balance your pond or waterfall. Select from Simple Solutions, Beneficial Bacteria, Problem Solving, Algae Fighting, Water Conditioners, Sludge Fighting, Fountain Treatments, and Lake and Large Pond Treatments.

Water Treatments

Simple Solutions

Maintain your water feature easily by tackling water quality and clarity issues with this line of easy-to-use water treatments and products. Choose between the Automatic Dosing System or manual pump-top bottles to dispense our specially-formulated water treatments.

Beneficial Bacteria

Aquascape beneficial bacteria water treatments are perfect for weekly application to maintain and establish balanced ecosystems. These treatments keep water clean, clear, and healthy.

Sludge Fighting

Aquascape sludge fighting water treatments eliminate and prevent pond sludge caused by fish waste, plant matter, and other decaying materials. These treatments keep rocks, gravel, and filters clean and provide clean, clear, and healthy water conditions.

Water Conditioners

Aquascape water conditioners help achieve ideal water conditions in ponds and other water features, making water safe for fish and caring for ponds simple and easy.

Algae Fighting

Aquascape algae fighting water treatments are the perfect, easy-to-use solution to control and treat algae.

Problem Solving

Aquascape Problem Solving water treatments quickly resolve a variety of problems, from clearing cloudy water to removing debris from rocks and gravel.

Fountain Treatments

Aquascape Fountain Treatments clean fountain surfaces and eliminate unsightly conditions including scale build-up, debris, and foam.

Lake and Large Pond Treatments

Aquascape Lake and Large Pond Treatments are intended for lake and large pond use only. These formulations are optimized specifically for larger bodies of water.

Simple Solutions

The Automatic Dosing System (ADS) is an electronically-operated dispenser that accurately and consistently applies your choice of specially-formulated water treatments to your water feature. The automatic dosing process eliminates the guesswork and routine associated with adding water treatments manually.

Aquascape offers an Automatic Dosing System for Ponds with four available water treatment options, and an Automatic Dosing System for Fountains with two available water treatment options.

Automatic Dosing System for Ponds
#96030

Packaged Weight: 6 lb
Packaged Dimensions: 9"L x 8.25"W x 14.5"H
- Free water treatment included (Maintain for Ponds)
- Ideal for use with ponds and water gardens

Automatic Dosing System for Fountains
#96031

Packaged Weight: 6 lb
Packaged Dimensions: 9"L x 8.25"W x 14.5"H
- Free water treatment
- Ideal for use with fountains and Pondless® Waterfalls

Features and Benefits

① **Water feature size indication** – The control panel shows the selected size of your water feature by displaying a blue light next to the number of gallons of water. The dosing system dispenses treatment into your water feature based on this number.

② **Increase/decrease pond size** – Use the plus (+) and minus (–) buttons to select the approximate number of gallons in your water feature.

③ **X2 button** – When pressed once, the 2 button will double the dosage for new ponds, problem ponds, or after a cleaning. When held, the system will enter a priming mode, automatically priming the system for newly installed water treatment pouches.

WATER TREATMENTS

Simple Solutions Water Treatments for Ponds

Clean for Ponds
**Use to naturally reduce organic
sludge and debris**

Clean for Ponds uses a powerful blend of heterotrophic bacteria to digest organic waste or sludge caused by uneaten fish food, fish waste, and leaves or debris, naturally cleaning the rocks and gravel. Reducing organic waste keeps ponds and pond filters clean while optimizing water clarity and quality.

PREDATOR CONTROL

Pond fish can be vulnerable to a variety of predators, including large birds such as the pesky blue heron. Fortunately, Aquascape provides several products to help pond owners prevent predators from harming their prized fish. Our popular ornamental deterrents help keep koi and other pond fish safe.

Floating Alligator Decoy
#93000

Packaged Weight: 2.5 lb

Packaged Dimensions: 11.5"L x 7.5"W x 10"H

Add a little fun to your pond while protecting your valuable fish. The natural body movement will deter herons and other predators from visiting your pond.

- Three hinged body parts allow gator to float freely and appear life-like, deterring pond predators
- Detailed in non-fading, no-glare, all-weather paint

Blue Heron Decoy
#81030

Packaged Weight: 2.25 lb

Product Dimensions: 28"L x 9"W x 6.25"H

Deter herons from coming to your pond by tricking them into thinking another heron is already there.

- Looks life-like
- Quick and easy set-up
- Hand-painted with non-fading, no-glare, all-weather paint
- Surface treated to prevent paint flaking
- Molded from durable, lightweight polymer

Faux Log Fish Cave

Packaged Dimensions: 22"L x 15"W x 13"H

- Provides pond fish shelter from predators
- Extremely realistic decorative accent for any size pond

SEASONAL CARE

Selecting Your Seasonal Care Products

The following components are vital to ensure that your water feature is properly maintained and your fish are cared for in the colder months of the year.

Cold Water Beneficial Bacteria (for spring and fall) — see page 81 for more information

Beneficial bacteria living in the biological filter and throughout the rocks and gravel in the pond are a key component to achieving crystal clear water and reducing pond maintenance. Aquascape Cold Water Beneficial Bacteria is perfect for both spring and fall because it works at temperatures below 50°F and contains pure strains of concentrated beneficial bacteria that go to work quickly, cleaning and balancing your pond.

Premium Cold Water Fish Food (for spring and fall) — see page 99 for more information

In the colder months of the year, when the water temperature is below 60°F, your fish's metabolism slows down in preparation for hibernation. It is important during these times to either eliminate fish feeding from your daily regimen or switch to Aquascape Premium Cold Water Fish Food. The inclusion of spirulina and wheat germ helps make the food easier to digest in colder water temperatures.

Gas Exchange

In colder months susceptible to freezing conditions, it is important to keep a hole in the ice to ensure proper gas exchange and keep fish safe during cold winter months. This can be accomplished using a variety of products including pond de-icers, AquaForce® pumps, aerators, or the Pond Powerhead.

Protective Pond Netting

Aquascape Protective Pond Netting keeps predators out while catching leaves and falling debris before they enter the pond. The reusable netting is easy to install and resists tearing. Each net comes complete with landscape stakes, making it simple and easy to cover your water feature. In addition to keeping leaves and debris from entering the pond, pond netting also protects fish from predators.

SEASONAL CARE

FISH CARE

Fish Food

Fish, like all creatures, need healthy, nutrient-rich food to thrive. Aquascape fish foods contain probiotics that aid in digestion, optimize growth rates, and reduce fish waste. Quality ingredients, including multivitamins and stabilized vitamin C, provide superior nutrition and will not break apart and cloud pond water. Aquascape fish foods are scientifically formulated to provide all pond fish, including koi and goldfish, premium quality nutrition at an affordable price.

- Floating pellet ideal for all pond fish
- Includes stabilized multivitamin and probiotics
- Will not break apart and cloud water
- Contains high-quality protein

Nets

Aquascape offers a variety of net options and sizes with both fixed and extendable handles.

Fish Treatments

On occasion, your pond fish may need treatments for illness or wounds. Aquascape offers products that treat parasites, bacterial infections, and fungal infections.

AQUATIC PLANT CARE

Aquatic plants are an important part of the water garden. They provide beauty and naturalization with a huge array of plant choices. Most importantly, they help balance the pond's ecosystem and provide valuable biological filtration that removes nitrogen, ammonia, nitrates, and other minerals from pond water. These excess nutrients are often the cause of unsightly water conditions. The end result helps to minimize pond maintenance, leaving more time to enjoy your pond. Without aquatic plants, your pond would not be able to function as a complete ecosystem.

Pond plants can be classified into a few main categories: waterlilies, marginal plants, floating plants, and submerged. Plants can also be put into two basic types known as "tropical" and "hardy." Hardy plants will over-winter in colder climates and tropical plants are more suited to warmer climates, although tropical plants are often used as annuals in colder climate zones.

Aquatic Planters

Aquascape Aquatic Planters are ideal for all pond plants. Made from fine, porous material, the planters allow water in while preventing soil from entering your pond. The flexibility of Aquatic Planters makes it simple to place plants between rocks and other form-fitting areas. Aquatic Planters blend into their surroundings and will not break or crack like traditional plastic planters.

DECORATIVE

Decorative Water Features
Decorative water features include Fire Fountains, container water gardens, bubbling rocks or urns, spitters, and more.

Fire Fountains
Fire Fountains combine the beauty and elegance of fire and flowing water in a durable, self-contained GFRC (glass fiber reinforced concrete) water feature that sets up in minutes.

Container Water Gardens
Container water gardens are great for people who do not have the space or budget for an ecosystem pond, providing a way to add a miniature pond to any location.

Decorative Spitters
Decorative spitters are often used to add a whimsical touch or create a focal point and water movement to existing ponds or container water gardens. Decorative spitters can also be incorporated into traditional landscapes when combined with a small reservoir.

Urns, Bubbling Stones, and More
These water features are typically set atop an underground reservoir known as an AquaBasin®. A water pump contained within the AquaBasin keeps circulating the water over the feature.

Fire Fountains

The Aquascape Fire Fountain provides the beauty and elegance of fire and flowing water in a bowl-shaped GFRC water feature. The self-contained water feature is a complete kit and sets up in minutes. Simply connect the included pump and plumbing, fill with water, and enjoy! The fire feature in the center makes this fountain an ideal focal point or centerpiece to any outdoor setting. Paraffin oil recommended (not included).

Features and Benefits of the AquaBasin® 45 and 30

① Large corner pump access panel fits larger pumps and sits elevated to prevent gravel from falling into the basin

② Pump and valve controls are easy to access for maintenance and adjusting water flow

③ Large, flat deck design makes it easy to set and position fountains

④ Professional-grade, high-density polyethylene construction

⑤ Drainage slots throughout the deck maximize water circulation

⑥ Structural deck cylinders provide endless plumbing and lighting port configurations, while reinforcing basin strength

⑦ Internal plumbing support allows plumbing to sit below the deck as it travels to the fountain(s), making installation simple and keeping plumbing out of sight

LINER, UNDERLAYMENT, AND GEOTEXTILE

Liner, underlayment, and geotextile are the pond's foundation. With a large selection of liners available, it is important to always determine whether the liner you choose is safe for fish that may inhabit the pond.

Aquascape 45 mil fish-safe EPDM pond liner leads the industry in quality and reliability. Backed by an industry leading 20-year guarantee, Aquascape pond liner is the choice of discerning pond professionals. With superior elongation and lay-flat characteristics, it installs easily with no special tools required. Aquascape 45 mil EPDM Liner also has exceptional resistance to solar UV, ozone, and oxidation.

Underlayment is installed before the liner to prevent punctures from rough or rocky ground. Not only does underlayment provide protection for the liner, it also allows the ground to breathe from underneath. The fabric allows the earth's gases to escape from underneath the liner rather than becoming trapped, causing gas bubbles to push the liner up into the pond.

PIPE AND PLUMBING

Flexible PVC Pipe makes installations quick and easy. The main advantage of this high-quality pipe is that it has the durability to be glued into standard schedule 40 PVC fittings.
- Simplifies plumbing layouts and installations
- Sun, ozone, and mildew resistant—NOTE: we do not recommend placing flexible PVC pipe in continuous sunlight
- Made in the USA

Kink-Free Pipe is an excellent choice for quick and easy installations without the use of PVC cement. This high quality pipe is extremely flexible and resistant to crimping or collapsing around tight curves. Kink-Free Pipe works best when used with traditional stainless steel hose clamps and barbed fittings.
- Simplifies plumbing layouts and installations
- Internal spiral prevents crushing and smooth inner wall reduces friction and maximizes flow
- Made in the USA

Pre-cut Kink-Free Pipe is ideal for for fountain installations. The pieces are cut and packaged in convenient six-foot sections, ideal for installations requiring smaller lengths of pipe.
- Internal spiral prevents crushing and smooth inner wall reduces friction and maximizes flow
- Works best when used with traditional barbed fittings and stainless steel hose clamps
- Made in the USA

Black Vinyl Tubing is ideal for recirculating water in fountains and other water features without the use of PVC glue. Our non-toxic, vinyl tubing is fish-safe, allowing for use in water features containing fish and plants.
- Durable construction
- Prevents kinking
- Flexibility makes installation quick and easy

Plumbing Materials provided by Aquascape include a complete selection of check valves, automatic water fill valves, and a variety of accessories, making it easy to complete any water feature with high quality plumbing products.
- Simplifies maintenance and installation
- Durable, professional quality products
- Easy to adapt to a variety of pipe types and sizes

Check Valves and Flow Control Valves

Dual Union Check Valve 2.0
#48026
Packaged Weight: 3.75 lb

The Dual Union Check Valve 2.0 provides a professional pump and plumbing connection inside skimmer filter systems, as well as Pondless® Waterfall Vaults. The innovative reversible fittings allow for universal application. The Dual Union Check Valve 2.0 prevents water backflow when the pump is not operating, while the dual-union, tool-free design makes maintenance quick and easy. The height is extendable for larger filters and pumps.

Features and Benefits

① Angled, swing-style valve effectively prevents back flow

② Heavy-duty flapper ensures longevity

③ Dual-union connections simplify pump and filter maintenance

Reversible Fittings Eliminate Guesswork

FITTINGS INCLUDED
(2) Reversible 2" MPT x 2" Slip,
(1) Reversible 1.5" FPT x 2" Slip

Dual Union 3" CVA Check Valve
#29098
Packaged Weight: 7.5 lb

The Dual Union 3" CVA Check Valve is ideal for larger installations that use large pumps and filters. Heavy-duty, dual-union design ensures years of trouble-free use.

2-Way Flow Control Valve
#88005
Packaged Weight: 1.5 lb

Water Fill Valves

Aquascape Water Fill Valves automatically add water to features when needed. They reduce the time-consuming maintenance of manually filling water features with a hose. Water Fill Valves also help protect the pump from running dry and eliminate large water chemistry swings (including chlorine/chloramine levels) that occur during manual top-offs.

Compact Water Fill Valve
#88006

Packaged Weight: .75 lb

- Up to 1.5 gallons per minute flow rate at a working pressure of 0-100 PSI
- Small size allows it to fit into any skimmer filter, Pondless® Waterfall Vault, or decorative water feature application
- Includes fittings to connect to a standard garden hose, ¼" poly-pipe, ½" poly-pipe, ½" pvc pipe (pipe sold separately)

Water Fill Valve 200

RAINWATER HARVESTING

Why Harvest Rainwater?

The Aquascape Rainwater Harvesting System (formerly known as RainXchange®) is a sustainable solution for water conservation and stormwater management.

Water Conservation

- According to the World Wildlife Fund, 1.1 billion people worldwide lack access to water and by 2025, two-thirds of the world's population may face water shortages.*

- Capturing and reusing rainwater reduces the community's demand on the municipal water supply, reduces the owner's water bills, and helps avoid strict water schedules.

Stormwater Management

- According to the EPA, stormwater run-off is one of the main reasons that our lakes, rivers, and estuaries are not clean enough for fishing or swimming.**

- Rainwater harvesting is a solution for managing stormwater run-off and decreasing flooding.

- Federal, state, and local regulations are requiring stormwater to be managed at the source. The Aquapscape Rainwater Harvesting System provides a solution to help meet these governmental regulations.

RAINWATER HARESTING

Step 2: Choose The Water Feature

Rainwater Harvesting Fountain Add-On Kit
#44000

Select from a number of decorative bubbling urns and stone fountains (seen on pages 90-108) that sit on top of the Aquascape Rainwater Harvesting System. The water spills over the top of the decorative piece and flows back down into the Aquascape Rainwater Harvesting Water Storage System where it is re-circulated.

Kit Includes:
• Pondless® Waterfall Vault
• Downspout Filter
• AquaSurge® 2000-4000 Adjustable Flow Pond Pump
• Kink-Free Pipe—¾" x 25'
• Overflow Kit
• Decorative Fountain Component Bag

Rainwater Harvesting Pondless® Waterfall Add-On Kit
#44001

This water feature is made up of a waterfall or stream that flows and then disappears gracefully into the gravel.

Kit Includes:
• Pondless® Waterfall Vault
• Waterfall Spillway
• Downspout Filter
• AquaSurge® 2000-4000 Adjustable Flow Pond Pump
• LED Lighting Package
• Flexible PVC Pipe—2" x 25'
• 45 mil EPDM Liner—10' x 20'
• Overflow Kit
• Installation Kit

Rainwater Harvesting Downspout Filter
#30166

The Downspout Filter is installed at the base of the downspout ready to capture and remove a variety of debris that may be flushed into the system during a rain event. Incoming rainwater is passed through a series of mechanical filters that remove leaves, twigs, seeds, and small sediment that accumulate on the surface of the roof between rain events.

• Utilize our online Rainwater Harvesting Calculator to determine how many Downspout Filters your project will require.
• Add a downspout filter onto a water feature and use rainwater to top off the water level.
• Handles up to a 1,500 sq. ft. roof and more than 50 gallons per minute flow rate.
• Add a downspout filter to any water feature and make it sustainable!

Step 3: Choose The Decorative Fountain
